ATMOSPHERIC RESEARCH

Contents Volume 37, 1995

Preface 1
Maximum and minimum temperatures: a backward and a forward look
D.E. Parker 3
Daily and monthly maximum and minimum temperature datasets archived at NCAR and some applications
D. Shea, R. Jenne and W. Spangler 11
The effect of artificial discontinuities on recent trends in minimum and maximum temperatures
D.R. Easterling and T.C. Peterson 19
The influence of night time cloud cover on the observed minimum temperature in China
C.B. Baker, R.G. Quayle and W. Wanlin 27
Assessment of urban heat islands: a satellite perspective
K.P. Gallo, J.D. Tarpley, A.L. McNab and T.R. Karl 37
Variations in the diurnal temperature range in the European region of the former USSR during the cold season
V.N. Razuvaev, E.G. Apasova, O.N. Bulygina and R.A. Martuganov 45
Fluctuation of maximum and minimum air temperatures in the Czech and the Slovak Republics
R. Brázdil, M. Budíková, P. Faško and M. Lapin 53
Maximum and minimum temperature trends in Ireland, Italy, Thailand, Turkey and Bangladesh
P.D. Jones 67
Trends in the diurnal temperature range over Australia since 1951
N. Plummer, Z. Lin and S. Torok 79
Southwest Pacific temperatures: trends in maximum and minimum temperatures
M.J. Salinger 87
Geographical distribution of changes in maximum and minimum temperatures
B. Horton 101
Some observations on climate variability as seen in daily temperature structure
D.A. Robinson, D.J. Leathers, M.A. Palecki and K.F. Dewey 119
Diurnal variations of cloud from ISCCP data
B. Cairns 133
Changes in minimum and maximum temperatures at the Pic du Midi in relation with humidity and cloudiness, 1882–1984
J. Dessens and A. Bücher 147
The detection of climate change in the Arctic: an updated report
H. Ye, L.S. Kalkstein and J.S. Greene 163
Long-term changes of the diurnal temperature cycle: implications about mechanisms of global climate change
J. Hansen, M. Sato and R. Ruedy 175
Diurnal temperature range and cloud cover in the Nordic countries: observed trends and estimates for the future
E. Kaas and P. Frich 211
Simulating the diurnal temperature range: Results from Phase 1(a) of the Project for Intercomparison of Landsurface Parameterisation Schemes (PILPS)
A.J. Pitman and A. Henderson-Sellers 229

Atmospheric ozone as a climate gas
W.-C. Wang, X.-Z. Liang, M.P. Dudek, D. Pollard and S.L. Thompson 247
Predicted and observed long night and day temperature trends
P.J. Michaels, P.C. Knappenberger and D.A. Gay 257
Comparison of observed seasonal temperature maxima, minima and diurnal range in North America with simulations from three global climate models
G. Kukla, J. Gavin, M. Schlesinger and T. Karl 267
Properties of extreme point rainfall I: Results from a rain gauge system in Denmark
P. Harremoës and P.S. Mikkelsen 277
Properties of extreme point rainfall II: Parametric data interpretation and regional uncertainty assessment
P.S. Mikkelsen, P. Harremoës and D. Rosbjerg 287
An improved method for determining the degree of snow crystal riming by vertical Doppler radar
L. Mosimann 305
Cloud electrification by fracture in ice–ice collisions: a 3D model
C.M. Scavuzzo, E.E. Avila and G.M. Caranti 325
The role of raindrop coalescence and breakup in rainfall modeling
Z. Hu 343
